Let's Start!

Writing Spot: Grab your tools - there's a leak!

Learning Outcome

Relate information about common solutions to problems in spoken and written documents.

Can Do Statements

- I can write about household problems.
- I can write about things that need to be done.
- I can talk about solving problems.

Ask your partner:

- Have you or a family member ever dealt with leaky pipes?
- Where was the water coming from?
How was it repaired?

Let's Explore!

Sally has an emergency! Quick, call the **plumber***

* A "plumber" is a tradesperson who specializes in installing and maintaining pipes for drinking water, sewage and drainage.

Instructions: Read the text aloud.

- Sally:** Thanks for coming on such short notice.
- Plumber:** You did sound a little panicked on the phone. You said something about a leak?
- Sally:** More like flood, actually. Last night, while my friend Vanessa was in the kitchen preparing dinner for us, I was taking a shower upstairs. Suddenly, water started gushing through the light fixture and onto the wood and carpet. This needs to be fixed immediately!
- Plumber:** Let's take a look. Yep, it looks as though the water is coming through the hole in the ceiling.
- Sally:** Look at the floor. The deluge has stained the carpet and bowed the wood.
- Plumber:** Do you need to use that bathroom upstairs for 24 hours? The walls need to be opened in the shower to work out how the water is escaping. There may be a problem with the grout.
- Sally:** Really? I have some friends coming from out of town tomorrow morning. The bathroom needs to be ready to use before they arrive. 24 hours would have been fine otherwise.
- Plumber:** I'll have an electrician come and look at the wiring. Let me make a call. I'll also get my apprentice to leave another job and help.
- Sally:** Hopefully that does the trick.
- Plumber:** These hardwood floors need to be dried out as well. I'll also have him bring our industrial heater.
- Sally:** That would be great!
- Plumber:** Before he arrives though, you will need to move all of the furniture away from the flooded area. Hopefully, this area might not need recarpeting.
- Sally:** That would be great.
- Plumber:** Alright, I need to run to my truck to grab my tools.
- Sally:** I really appreciate it.

**Let's Practice!**

Sally is upset about the damage!

Instructions: Underline the incorrect words in the sentences. Re-write the sentences.

1. I'll have an electrician came and look at the wiring. _____
2. I'll also gets my apprentice to leave another job and help. _____
3. I'll also have him bringing our industrial heater. _____

**Let's Practice!**

What needs to be done when water gushes in?

Instructions: Match the words from each column to correctly complete each sentence. Read the sentences aloud. Check your pronunciation with your instructor.

COLUMN A

1. This needs to
2. The walls need to be
3. These hardwood floors
4. The bathroom needs
5. The remodeling needs to

COLUMN B

- a. opened in the shower to work out how the water is escaping.
- b. need to be dried out as well.
- c. to be functioning before they arrive.
- d. be fixed immediately!
- e. be finished before the furniture goes back in.

Extension Activity

Ask a friend about their house!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find a partner.
- Write 5 questions to ask them about house repairs they had done. ('What have you got someone to do in your house?', who, why, etc.)
- Interview your friend using the questions.
- Write down their answers.

Self-Assessment

Yes

No

I write about household repairs.

☐ ☐

I ask about household repairs.

☐ ☐

I write answers about household repairs.

☐ ☐

Target Words

- **to gush** (verb): to flow out suddenly
e.g. Suddenly, water started gushing through the light fixture and onto the wood and carpet.
- **fixture** (noun): something attached permanently, usually to a wall.
e.g. Suddenly, water started gushing through the light fixture and onto the wood and carpet.
- **deluge** (noun): a great flood of water
e.g. The deluge has stained the carpet and bowed the wood.
- **to bow** (verb): to bend or curve
e.g. The deluge has stained the carpet and bowed the wood.
- **grout** (noun): a coat of plaster for finishing a ceiling or interior wall
e.g. There may be a problem with the grout.
- **industrial** (adjective): relating to industry
e.g. I'll also have him bring our industrial heater.

Learning Points

Need + Passive Infinitive and Need + Verb + -ing

You use the passive infinitive to express something that is necessary.

It can be used in affirmative, negative and interrogative sentences.

The structure *need + verb(ing)* means the same thing as a passive infinitive.

Need + verb -ing	Passive Infinitive
<i>The pipes need fixing.</i>	<i>The pipes need to be fixed.</i>
<i>The carpet needs removing.</i>	<i>The carpet needs to be removed.</i>
<i>The hardwood floors need drying.</i>	<i>The hardwood floors need to be dried.</i>

Examples:

- *That problem needs to be solved immediately!*
- *The walls need to be opened in the shower to work out how the water is escaping.*

Learning Points

Causative *Get* and *Have*

You use a causative verb to express an action that someone did for you or instead of you, or someone did for another person.

It is called a causative verb because the subject of the sentence causes the action, but is not responsible for doing it.

To have someone do something

You use the form:

subject + *have* + person + infinitive

Here is an example:

I had my apprentice bring the industrial heater.

To get someone to do something

You use the form:

get + someone + *to* + infinitive

Here is an example:

The plumber gets his workers to complete the projects.

Examples:

- *I'll also have him bring our industrial heater.*
- *I'll get my apprentice to leave another job and come help.*
